

The Active System

The Active System is a comprehensive, State of the Art, Computer Software System that offers Clinical and Production Support to the Dietary Manager, Dietary Department, Dietitian, Nursing Staff, Residents, and Family Members. The completely automated Culture Change Package allows for the implementation of online menus and a Kitchen Request Board that streamlines the service to your Residents and Family members in a effort to provide the foods they want, when they want them, and where ever they want to have their dining

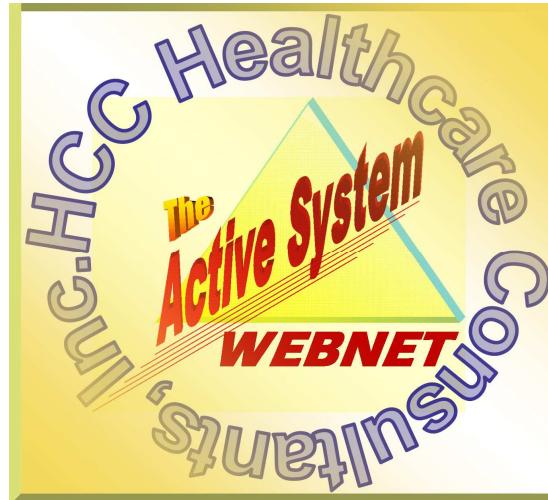

experience. The system features changing of dining locations on the fly, as well as text message monitoring systems to ensure consistent implementation.

The Kitchen Request Board

Phone Based Systems
at the Same Time.
Web Hosting Included
for the Facility,
Residents and Families**

Your Residents, Family Members, and Staff will have username and password access to the online select menus and the Kitchen Request Board. This will allow your staff and Family Members to help your Residents to select their menus just one time and then have those selections saved for future use. This will allow for food choices to be made without the constant hassle of having to select a menu each week. Of course, changes to the selections can be made at any time. The kitchen will have precise, accurate tallies ahead of time for ordering, and all of it will be done without any labor after the initial selection process.

The Kitchen Request Board handles incidental meal and between meal requests with full text message monitoring support. Again, the Kitchen Request Board is fully automated and requires no additional labor investment.

What an HCC Consultant Dietitian Can Offer Your Facility

**Comprehensive Historical
Nutritional Assessments** that can be printed, or pasted into your computerized charting system.

**Complete Weight Management
System** that documents all discussions and interventions in each Resident's medical chart, or computerized charting system.

**Coordinated and integrated
charting with your Dietary
Manager.**

**Software Management and
Coaching support to ensure
that you get the maximum
benefit from the Active System**

**Menu Management to include
imputing the facility menu into
the Active System to allow for
dynamic menu changing in
accordance with Resident
input, Display Menus, Select
Menus, Production Sheets,
Food Temperature Sheets and
much more.**

**Culture Change ...
without adding staff or
increasing food cost.**
